

SHTOX ROTATING WHISKEY GLASSES

It is a unique whisky tumbler that can be set into a spinning motion with a single movement of your hand. It can rotate around its axis on any smooth horizontal surface for about 20 seconds. Many designs from which to choose.

- a great accessory for your home
- an extraordinary gift
- an opportunity to amaze friends and guests
- because of its special décor, the rotating glass creates a marvelous play of color and light
- the rotation of the glass creates meditative and relaxed atmosphere

The secret of the rotation lies in the peculiar, specially designed shape of the bottom. The bottom of the glass is ground manually. The invention is protected by patent.

The Shtox glass is produced from high-quality 24% lead crystal in Germany.

[California Proposition 65](#)

In 2009 the glass was awarded with **reddot** Design Award in the category “Product Design”
